CAREER SUMMARY

MCA (Cyber Security) student with a strong foundation in Python, databases, and dashboard creation seeking an entry-level role in Multi-cloud, Digital Workplace, or IT Operations.
Eager to apply technical skills, problem-solving abilities, and continuous learning to support enterprise IT services and operational excellence.

WORK EXPERIENCE

IT Assistant

Suryodaya College of Engineering & Technology (Nagpur)

Dec 2024 – Jul 2025
College IT Department

- Assisted in assembling, maintaining, and managing 350+ desktop systems across college labs.
- Diagnosed and resolved hardware issues including RAM, SMPS, and motherboard failures.
- Configured and maintained LAN connectivity to ensure stable internet across departments.
- Crimped RJ45 cables and verified network connectivity using cable testers.
- Supported faculty and students with OS installation (Windows, Linux) and software setup.

IT Assistant

New Era Hospital, Nagpur

Jul 2023 – Dec 2023

- Installed and configured hardware devices including printers, routers, and peripherals.
- Troubleshot and resolved system, network, and software issues.
- Maintained records of hardware installation, repair, and replacement activities.
- Provided day-to-day IT support to ensure smooth hospital operations.

Apprenticeship Trainee (IT Support)

Proper Computer Institute of Technologies, Nagpur

Aug 2022 – Jul 2023

- Assisted IT support engineers in daily system administration and troubleshooting tasks.
- Installed and configured operating systems including Windows 7, 10, and 11.
- Managed antivirus setup, internet configuration, and basic system security.

- Supported network setup including switches, access points, WiFi configuration, and VPN setup.
- Performed driver installation and system optimization for end users.

TECHNICAL SKILLS

Programming Language: Python, Basic Java, C and C++, HTML, CSS, Java Script

Database: SQL, MongoDb, PostgreSQL.

Project

IoT-Based Heart Monitoring System with Cloud Dashboard

- Developed a real-time heart monitoring system using ESP8266 and MAX30102 sensor.
- Integrated MQTT-based data transmission with ThingsBoard cloud for remote monitoring.
- Built a custom web dashboard using HTML, CSS, JavaScript, and Chart.js to visualize live heart rate data.
- Fetched telemetry data from ThingsBoard using REST API for real-time updates.
- Displayed BPM on OLED and implemented validation logic for accurate readings.
- Technologies used: ESP8266, MQTT, ThingsBoard, HTML, CSS, JavaScript, Chart.js.
- https://github.com/Pratikfating123/IoT-Heart-Monitoring-System-with-AI-Dashboard

IoT-Based Smart Assistant using Google Gemini (Text-Based)

- Developed a text-based smart assistant integrating Gemini API to process user commands and generate intelligent responses.
- Built a system to send commands from a user interface to IoT devices for automation and control.
- Implemented API-based communication between frontend interface and backend IoT system.
- Enabled real-time execution of commands like device control and status retrieval using text input.
- Designed a simple and efficient architecture combining AI and IoT for interactive automation.
- **Technologies Used:** Python, Gemini API, REST API, IoT (ESP32), HTTP/MQT

SmartLink, URL Shortener & Analytics Platform

- Developed a full-stack URL shortening application that converts long URLs into unique, shareable short links.
- Implemented secure user authentication and authorization using JWT.
- Integrated MongoDB for efficient storage and management of users and shortened URLs.
- Built click tracking functionality to monitor URL usage and user engagement.

- Developed an analytics dashboard to provide insights into link performance.
- Designed RESTful APIs and implemented middleware for secure and scalable backend operations.
- **Technologies:** Node.js, Express.js, MongoDB, JWT, JavaScript, REST APIs
- **GitHub:** github.com/Pratikfating123/smartlink-url-shortener

Cybersecurity Passwordless Authentication & Risk-Based Login System

- Developed a passwordless authentication system using secure Email OTP and QR-based login mechanisms.
- Designed a risk-based authentication engine that evaluates login attempts using device, IP address, OTP failures, and trust signals.
- Implemented secure session management with cryptographically generated tokens, expiration, device association, and session revocation.
- Built security monitoring features including device tracking, login history, risk scoring, and automated security alerts.
- Enhanced application security through OTP hashing, expiration policies, attempt limits, and rate limiting.
- **Technologies:** Python, Flask, MySQL, Flask-Mail, Flask-Limiter, QR Code, OTP Authentication
- **GitHub:** github.com/Pratikfating123/Cybersecurity-Passwordless-Login

AI-Powered URL Threat Detection System

- Developed a Machine Learning-based cybersecurity system for detecting phishing and malicious URLs using URL feature analysis and threat intelligence.
- Trained and evaluated a Random Forest classifier achieving **87.51% accuracy, 87.57% F1-score, and 0.9473 ROC-AUC**.
- Extracted security features including suspicious keywords, IP addresses, HTTPS usage, subdomains, encoded characters, and URL shortening patterns.
- Integrated VirusTotal threat intelligence with ML predictions to generate combined risk scores and classify URLs as **Safe, Suspicious, or Phishing**.
- Built a Flask web dashboard with real-time URL scanning, risk analysis, detection explanations, and SQLite-based scan history.
- **Technologies:** Python, Flask, Scikit-learn, Random Forest, VirusTotal API, SQLite, Pandas
- **GitHub:** github.com/Pratikfating123/AI-URL-Threat-Detection

AI-Powered Personal Finance Advisor

- Developed an AI-powered personal finance management platform for tracking expenses, budgets, financial goals, and spending patterns.
- Integrated OpenAI API to implement automatic expense categorization, personalized financial insights, spending predictions, and AI-generated monthly reports.
- Built a context-aware AI financial advisor that provides personalized responses using user financial data.
- Designed RESTful backend APIs using Node.js and Express.js with PostgreSQL and Prisma ORM for database management.
- Implemented Redis caching for AI-powered dashboard insights and predictions to improve application performance and reduce API usage.
- Containerized the full-stack application using Docker Compose with separate frontend, backend, PostgreSQL, and Redis services.
- **Technologies:** Next.js | React | Node.js | Express.js | PostgreSQL | Prisma | Redis | OpenAI API | Docker
- **GitHub:** github.com/Pratikfating123/AI-Personal-Finance-Advisor

EDUCATION AND CERTIFICATION

JSPM University, Pune |2025 – 2027

Master in Computer Application - Cloud Computing (Pursuing)

Shri Mathuradas Mohota College of Science, Nagpur |2020 – 2023

Bachelor of Science in chemistry

Percentage:- 65.40

Sant Jagnade High School, Nagpur | 2020

Science, XII (Higher Secondary)

Percentage:47.60

N.S.V.M. Fulwari School, Nagpur | 2018

Science, X (Secondary School)

Percentage: 60.60

Certificate

- CCNA 200-301 Network Fundamentals (Online)
- Introduction to Generative AI Studio
- Introduction of Cyber Security (Online)
- Cisco Certified Support Technician Cyber Security
